

Perforations

We are constantly seeing new and creative uses for Perforations. At Morin, we focus on more functional creative applications of standard processes, spot hole patterns and very ingenious uses.

We produce a wide variety of hole options, and patterns, spot patterns and custom repeat patterns that work with roll or break forming panels for specific applications.

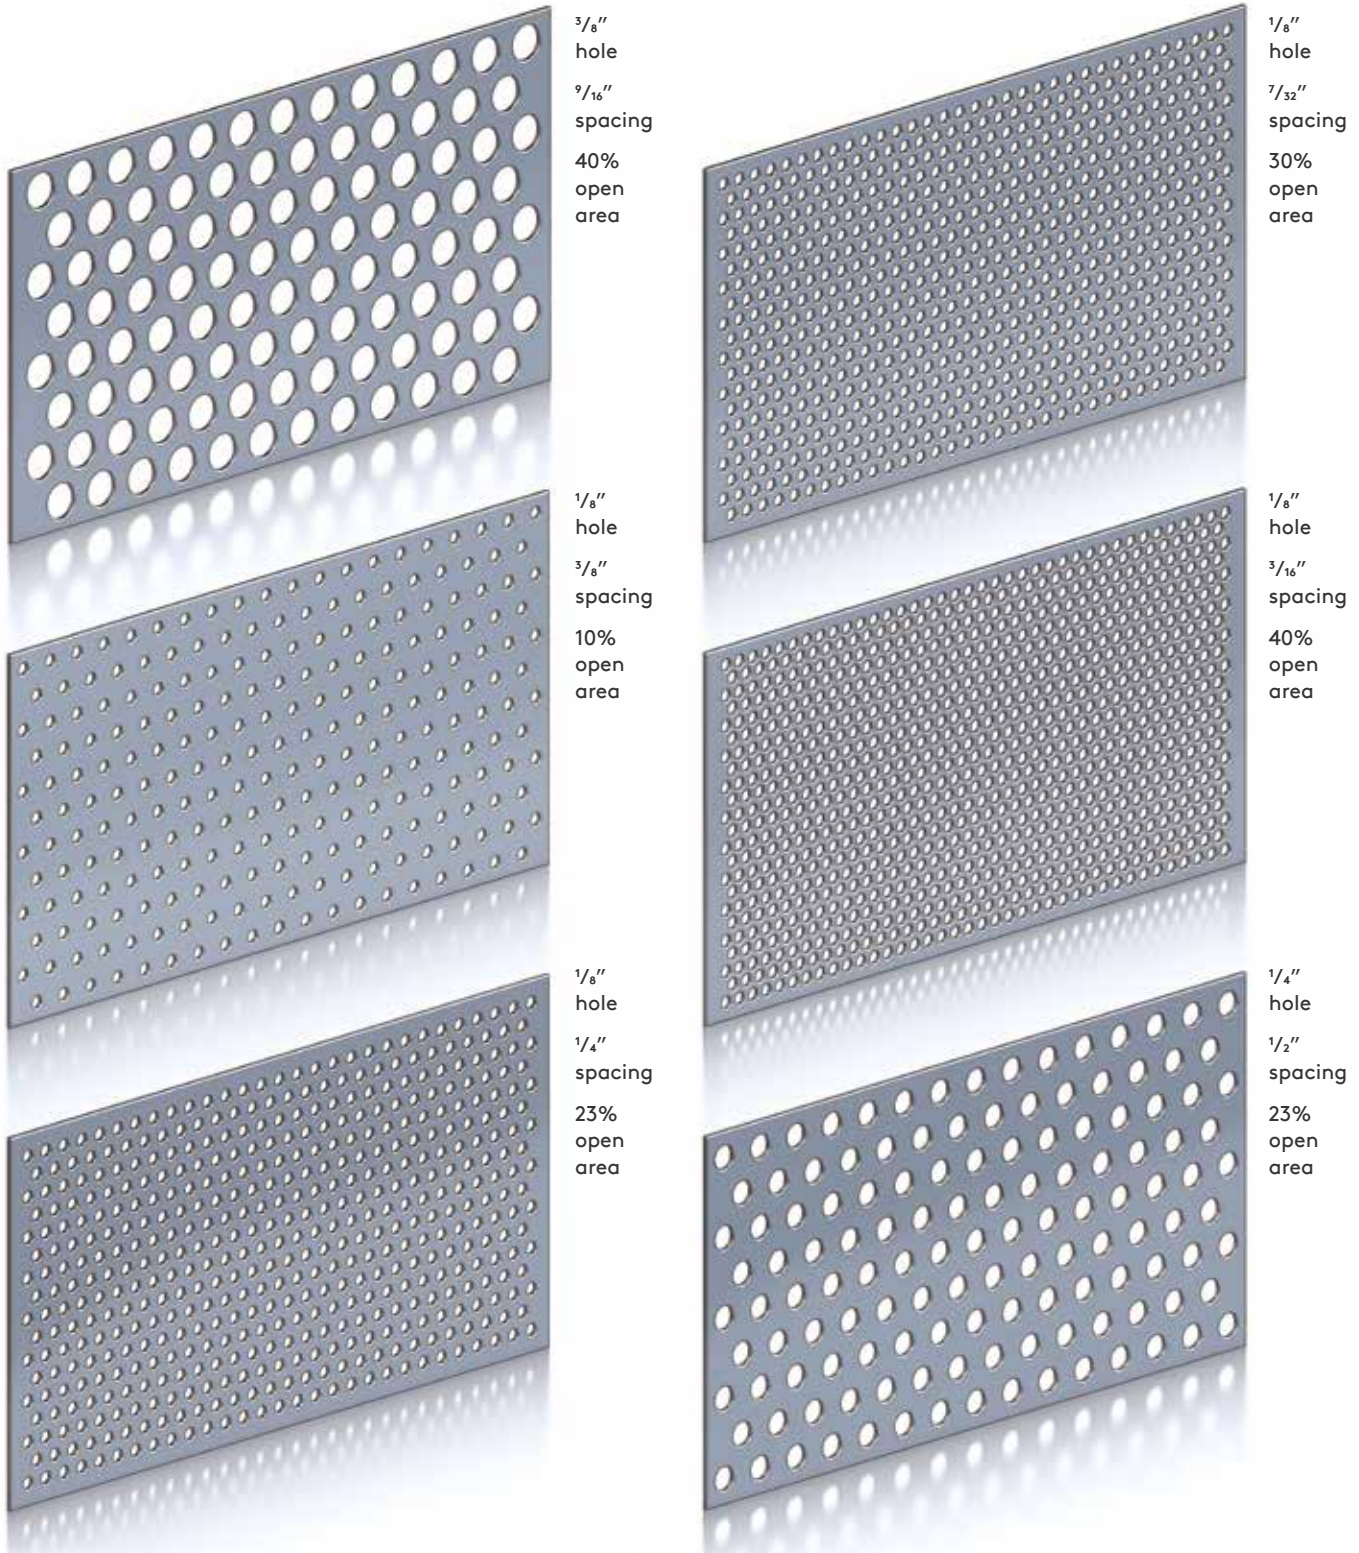

Perforation uses

- Sun screen shade
- Noise reduction
- Security screening
- Airflow heating / cool
- Wind reduction
- Visual openness

Suggested gauges

- Aluminum - .040 - .050
- Stainless steel - 24 and 22 gauge
- Cor-Ten - 22 and 20 gauge
- Zinc - 1.0 mm, 1.2 mm
- Galvalume painted - 24 and 22 gauge - interior

All profiles are available with these standard patterns

Contact us to review hole direction in relation to perforating process, and panel orientation.
Custom patterns and spot perforations available!
